

What is Oneness Centrum?

There is no doubt that the greatest challenge for us now is the art of understanding things around and inside us. Every man, young or old, healthy or ill, poor or rich longs for the only thing – to be happy. We all are the creators of our everyday reality, the creators of our own and collective destiny.

Therefore the real happiness is the moment when you understand how your life is created (literally radiated into space), and how you can create the circumstances for happiness and prosperity. In fact, you will realize that it is not you yourself who creates the happiness. On the contrary, it is the oneness of the being, joyful, unforced and harmonious power of nature which you can find inside of you and which will penetrate your life if you want it and allow it to happen. In other words, your happiness depends on how much you are able to experience your joy inside and follow it and how much you are able to identify with it. Right now, while are you reading, have a look inside of you whether you really feel happiness or not. It would be best to keep on looking until the feeling of happiness appears. At this moment you are creating your own future. If you want to fulfil your life, look for this connection with the power of being inside of you, which also gives you a joy and happiness.

The moment you realize the creative power inside of you has a great power. It can completely change your present way of life. It can bring gentleness, sharing and real love into your relations, it can uncover your lifetime dream – the vision, which will spontaneously come true, it can heal your body, help you to find a partner or a new work. You will get rid of things you depend on so that you can freely live and express yourself. What you are looking for is already inside of you. But now you can see it as your own physical reality which is at hand when you are not afraid to be open to it. Your life will start to vibrate with harmonious power of nature and you will most probably become the strong inspiration for the people around you. You are connected with the whole nature, with every man, so your awakening automatically influences a great amount of people. You are led to this step by personal predispositions but it is important to use all your sincerity and personal capacity – the energy which you had accumulated by your own effort or which you take from outer natural sources.

Oneness Centrum is a place with high natural energy. It is space created for you to meet yourself and omnipresent being. In the force field of this place the obstacles that prevent you from feeling happy will be spontaneously dissolved and the circumstances for deeply fulfilling life will be created. During this process you will find the bliss inside of you and unforced activity as the basic quality of life. If you experience this inner state properly the joy and effortless creativity and prosperity can become your everyday reality.

The project Oneness Centrum was established in 2006. At present we are preparing the reconstruction of premises so that the potential of the place can serve the public even better.
